Moisture was abundant all season and the field drained well enough for plants to remain healthy and produce ears mostly 18 rows around. Kernel depth was excellent and test weights were high. Seasonal rainfall totals from planting through maturity was about 9.6" above the 30-yr average for this area.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
