**Test Comments:** *Planting efforts overall were delayed in this area from early spring showers and poor soil drying conditions. Once in the ground though, emergence was excellent & steady showers throughout the season set up well for ear development, pollination and grain fill. Ears set kernels to the tip and test weights were good. Rainfall total from planting through maturity was about 5" above the area 30-yr avg.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
