Test Comments: *Planting conditions were very good with very good seed bed. Plant emergence was very good. Moisture was ample during June. Rainfall was nearly 5" below average through harvest in this area, reducing yield potential. At harvest, plants looked healthy with very little green foliage. Ears were either short and girthy or long and slender filled with small kernels. Good weed control here.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
