New test site, no yield history

Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.030 Prices: GMO = \$3.25; non-GMO = \$3.25

Test Comments: Many things went right to get big yields on this highly productive site. Planting conditions were ideal and emergence excellent to give the crop a good start. The season was dry until some big mid-August rains. Only 7.4" from planting until VT, enough to complete pollination without tipback. August was cool which slowed crop progress but also brought needed moisture to give deep kernels.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
