**Test Comments:** *Early maturity products struggled at this site more than later products. Jason, our host farmer, said that small isolated showers throughout the brought limited rainfall and yields reflect this. Plants in the early-season test were short with slender stalks and stubby girthy ears. Later hybrids were taller with thick stalks and long slender ears. At harvest, 16+ mph winds broke plants just below the ear.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
