TEST COMMENTS: Tough soybean year in the area. White mold was common in many fields as well as this plot. Flat pods in the tops of plants and sclerotia in bean samples was typical across varieties. Many plants were tall but not podded well enough for big yields. Seasonal rainfall totals from planting through R6 on Sept 13 ended at about 3.5" below the 30-yr average for this area.

† See last page for abbreviation descriptions. Results in bold are significantly above test average by LSD (0.10). ns = column values not significantly different.
