TEST COMMENTS: *The site was no-till planted into good soil conditions. Near normal growing conditions experienced through July before turning dry during grain fill. Pods were small and contained small sized seed due to the limited rainfall. Plant height was uniform across the test, approximately 35 inches tall. No major disease issues but there were a few waterhemp plants sporadically throughout the test.*

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
