**Test Comments:** *Planting conditions were very good and resulted in good stands when counted in early June. At harvest, plants still had green foliage. Gray leaf spot and leaf blight could be seen. Plant stalks and brace roots were strong with no lodging issues. Kernel depth was very good with kernels filled to the ear tip. Tom was pleased with his yields this year, even after the stress they endured this growing season.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
