**Test Comments:** *This is our first year of testing in this drought prone area. Dave and Ray, our host growers, both predicted this summer would have a drought. Planting went very well and emergence was good. June, July and August were very dry. Plants stood well at harvest but weak stalks were seen. Seed set was very good, little tip dieback and good kernel depth. Dave and Ray were shocked by their good yields.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
