Test Comments: *Planting conditions and seedling emergence was very good at this location. ears pollinated very well, August storms with high winds caused some hybrids to lodge. At harvest, stalk quality was poor but roots were strong. Plants were well matured. Ears had strong shanks and cobs which made shelling easy. Tom indicated that area fields with corn on corn 5+ years had lower yields than expected.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
