Test Comments: *Planting conditions and seedling emergence was very good here. Brent and Steve, our host growers, said an early June storm caused greensnap in the area. The full season test had greensnap, noted in lodging scores. At harvest, plants stood well with minimal disease. Ears in the early test had very good girth. Full test ears were long, slender with small kernels. A few hybrids had weak ear shanks.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
