Test Comments: *Planting conditions were very good and emergence looked strong. Before the ears could set, this area received storms with high winds that caused root lodging and some greensnap of several later maturing hybrids. At harvest, early hybrids were well matured. Large ears with good kernel depth and strong cobs were the norm. No weed control issues. Area harvest has been delayed by wet conditions.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
