Yield & Income Factors: Base Moisture = 13.0% Shrink = 1.3 Drying = \$0.020 Prices = \$8.00 GMO; \$8.00 non-GMO

TEST COMMENTS: Showers during the first ten days of May pushed back soybean planting in the area for many farmers. Effective field drainage was crucial this year as June delivered 11" of rain causing widespread flooding locally. Plant growth stalled slightly from extended periods of soil saturation, however, healthy plants were resilient; 3 & 4 bean pods were common. No major foliar diseases noted.

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
