SEEDED - RATE - ROW: Jun 4 144.0 /A 30" spacing

HARVESTED - STAND: Oct 18 129.4 /A

TEST COMMENTS:

Planting was pushed back into June, and the delay of corn and soybean planting progress in the area was wide spread. Emergence suffered just a little but final stands were still adequate for high yield potential. Showers remained consistent and abundant through the growing season. This field received 21.9" from planting through October 1, 5.2" over the 30 year average. Plants were short at harvest, but internodes were close and seed size was very good. A few later maturity varieties may have been impacted by frost. Those varieties threshed well but were very slow to dry down.
