SEEDED - RATE - ROW:	May 16 144.0 /A 30" spacing
HARVESTED - STAND:	Oct 18 133.4 /A

TEST COMMENTS:

This Marquis loam has very good fertility and drainage which can often allow soybeans to easily reach yields in the 70's under ideal conditions. The trial this year didn't get off to the best start but finished reasonably well. Planted by mid-May, this plot encountered about 5" of rain and cold weather in the first couple of weeks. While there was some occurrence of damping off, plant stands didn't appear to suffer too much overall. Moisture in June brought 4.6" and by July totaled just 1.4" for the month. August was cool. By the second week of October, plants had matured well ahead of other locations with the same maturities in the western parts of Iowa.
